

**LOCATION:**

Franklin, MA

**CLIENT:**

Chappell Engineering Associates, LLC

**PROJECT TYPE:**

Retail Development

**PROJECT SUMMARY:**

- ▶ 45,000 Sq Ft of Retail Space
- ▶ Traffic Signal Design
- ▶ Public Participation
- ▶ Traffic Analysis

Traffic Solutions was responsible for traffic counts, traffic signal improvements, and traffic signal specifications for the 45,000 SF Market Place Project. The development program consists of several retail establishments as well as a drive-thru bank. This development is situated on East Central Street (Route 140) in Franklin, Massachusetts.

An analysis of outdated and current traffic count data was performed to assist with the permitting of the project. Traffic Solutions designed the pavement marking and traffic signal improvements to the nearby intersection of King Street at Route 140. Specifications for the traffic signal work were also provided as part of this project. An architectural rendering of the development was provided as part of our services. This rendering consists of a perspective view from the intersection of Chestnut Ridge and Route 140. Traffic Solutions also attended a public hearing in support of the project.
