

**LOCATION:**

Hingham & Rockland, MA

**CLIENT:**

AW Perry

**PROJECT TYPE:**

Office Development

**PROJECT SUMMARY:**

- ▶ Transportation Engineering
- ▶ Transportation Planning

AW Perry retained Traffic Solutions to assist permitting Blue Cross Blue Shield's regional headquarters, in Hingham, MA. Although the 500,000 SF facility is located in Hingham, much of the mitigation was in Rockland, MA, abutting Route 3.

Traffic Solutions prepared design plans to finalize the project's requirements as directed by MassHighway.

Traffic Solutions worked very closely with the district MassHighway office, ensuring that the mitigation requirements in the Section 61 Finding were fulfilled. This involved designing a mitigation package that required coordination with the Route 3 Reconstruction Project.

The interchange design plans called for temporary construction staging, including a temporary bridge parallel to Route 3. Traffic Solutions prepared a mitigation design that was sensitive to the ongoing work. The design was both responsive and timely. This plan, as well as our responsiveness, provided the Developer with timely approvals from MassHighway, so they could deliver the product to their client on schedule.
