

**LOCATION:**

Somerville, MA

**CLIENT:**

City of Somerville

**PROJECT TYPE:**

On-Call Engineering Services

**PROJECT SUMMARY:**

- Traffic Signal Operations
- Traffic Maintenance
- Safety Procedures

The City of Somerville retained Traffic Solutions to assist the City on a broad range of transportation-related issues of varying size and complexity. Our firm participated in the general review of development projects, suggested design modifications, and recommended mitigation measures.

The firm also provided guidance to the City's Traffic Engineer on the implementation of various traffic improvements, including traffic signal phasing improvements and pavement marking strategies throughout the City.

In addition, Traffic Solutions provided technical and administrative advice regarding traffic maintenance equipment, traffic contracts, and traffic maintenance staff. Our engineers also assisted in developing technical and policy procedures related to Traffic Commission, Traffic Management, and Emergency Evacuation Routes.
