

LOCATION:

Statewide, MA

CLIENT:

Various Clients

PROJECT TYPE:

Peer Review/Expert Witness

PROJECT SUMMARY:

- Traffic Engineering
- Zoning Review
- Planning Review

Traffic Solutions has provided peer review services for cities and towns throughout the Commonwealth of Massachusetts involving a wide variety of development projects. Our role in these peer reviews has been to ensure that the a comprehensive and accurate investigation of anticipated impacts have been mitigated appropriately so that the municipality is not faced with traffic issues after a development opens.

Typically peer review services include several tasks such as: performing site visits; reviewing plans for vehicular and pedestrian flow; reviewing studies and/or analyses for accuracy and thoroughness; confirming compliance with standards, requirements of zoning laws, and other rules and regulations; and reviewing sight distance accommodations from the site. Traffic Solutions also provides professional guidance regarding the adequacy of the proposed mitigation in order to bring the application into compliance with the City/Town's standards and requirements. Frequently, we are requested to present our findings to officials of the city or town. We have also been retained by our clients to provide expert witness testimony in court proceedings.
