

LOCATION:

Newton, MA

CLIENT:

City of Newton

Parks & Recreation Department

Park Friends, Inc.

PROJECT TYPE:

Streetscape Improvements

PROJECT SUMMARY:

- Lighting Plans

The City of Newton Parks and Recreation Department, in conjunction with a neighborhood association called Park Friends, Inc., retained Traffic Solutions to prepare a street and pedestrian lighting plan for Washington Park in Newton, Massachusetts. The project sought to provide post mounted historical period lighting for the park. The intent of the project was to bring to highlight the historical nature of this small but elegant neighborhood park.

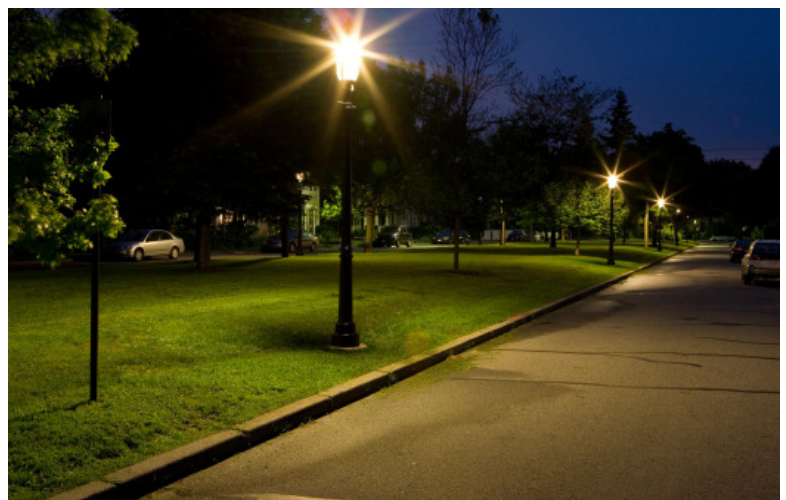

Traffic Solutions assembled a base plan from available historical plans and supplemented the old plans with field measurements. The base plan was then developed into contract plans depicting the placement of the lighting poles and fixtures, as well as the conduit and related electrical systems. Traffic Solutions was also responsible for contract documents (specifications and estimates) as well as advice during construction.
